

Prolific Task Description

Instructions

You will be asked questions about your child's school experience and your perspectives on it. You'll also read stories that reflect collective voices from other parents about their experiences with school diversity. Please take your time to carefully read and respond to each question.

This HIT is part of a scientific research project from [REDACTED]. Your decision to complete this HIT is voluntary. There is no way for us to identify you. The only information we will have, in addition to your responses, is the time at which you completed the survey. The results of the research may be presented at scientific meetings or published in scientific journals. Clicking on the 'SUBMIT' button on the end of the survey indicates that you are at least 18 years of age and agree to complete this HIT voluntarily.

Investigator: [REDACTED]

We'll start with a few basic questions about your and your child's experiences with their school. If you have multiple children attending different schools, please share your views on your youngest child's school throughout this entire survey.

Parents fear that rezoning for diversity will negatively impact their children's education quality and opportunities.

We chose to build our house in this school district on purpose¹. When I was a student, I was bused to different schools for diversity reasons². This made me lose sleep and feel unsafe. Now, I'm worried my kids might face the same problems. The new rezoning plan doesn't make schools better in any way³. It just makes families like ours upset³. I know diversity is important⁴, but I'm concerned that rezoning will take away the good things we worked hard to give our children⁴. It might also lower our property value and make us think about leaving the school system⁵.

[1]: Allowing children to continue to put in choices should be as far as we go. We paid more to be in our preferred school district. We made a conscious decision when building our house. This would be unfair to take that away from us. You are punishing those who work hard to provide the best for their children. If I wanted my child to go to any other school, I wouldn't have paid more for my house to be in this school district. Homes in this district are pricier, what would be the benefit of decreasing our home values? I do not want my child at schools like [SCHOOL_NAME] where students are allowed to slap teachers. This is not an environment that I would feel comfortable sending my child to school. Also we drive our child to school instead of putting him on the bus, moving him to a school further from home would be disadvantageous for us. Children already have enough opportunities to engage with other kids from other socioeconomic statuses through sports and clubs outside of school. We have a diverse group of friends and neighbors. We don't need to mix up schools to foster this.

[2]: We purchased our home, in the community that we did, so our children would be in the likeminded, same socioeconomic group as us, with families and friends that they can be positively surrounded by. To change their diversity is to slap us across the face and say our choices, wishes and plans no longer matter. I grew up in [SCHOOL_DISTRICT_NAME] in the 90s and was bussed downtown from [LOCATION_NAME]. I sacrificed sleep and safety so that [SCHOOL_DISTRICT_NAME] could diversify. If my parents wanted me to go to school

If my parents wanted me to go to school there, we would have moved there. But they didnt. Changes like this again will force even more families to homeschool or seek private education.

[2]: I drive farther to take my children to a school with better academic programs and teachers that are performing- which makes my children perform! What needs to happen instead of this idea is giving those schools more resources to help these teacher get their students performing and not worry so much about feelings and diversity! God and my family loves everyone no matter what color their skin is! If this comes into effect, my family have talked about selling and moving into other counties.

[3]: Inclusiveness is not the schools responsibility, nor a reason I pay tax dollars. I moved my family to an area with schools possessing strong academics, with little regard for diversity or inclusiveness. I can teach my children the value of diversity
